DETAILED ACTION

Election/Restrictions

1. Claims 13, 16-40 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 11.

Information Disclosure Statement

2. The information disclosure statement filed 9/17/02 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to (WIMMER DIETER, "PLASTIC MATERIAL CONSTRUCTION") therein has not been considered.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6, 9-12 and 14-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Althaus.

Art Unit: 3724

Althaus discloses (Fig. 1-7) the invention including a plastic body 1 including a leading edge and a trailing edge, a series of guard ribs (11, 111 and 211), cutting blades 2, cutting edges 3, a guard bar 18, a cap 20 and a lubrication strip 21.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Althaus in view of King et al.

Althaus discloses the invention substantially as claimed except for a series of depressions and projections. However, King teaches the use of a series of depressions 44 and projections 40 for the purpose of increasing the tension on the skin and releasing an amount of shaving cream to the surface being shaved. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Althaus's guard bar by providing the series of depressions and projections as taught by King in order to obtain an increase in the tension on the skin and release more an amount of shaving cream to the surface being shaved.
